

223 REMINGTON

RIFLE: Remington 700
BARREL: 26", 1 in 12" Twist
CASE: Winchester
PRIMER: Winchester WSR

BULLET DIAMETER: 0.224"
MAXIMUM C.O.L.: 2.260"
MAX. CASE LENGTH: ... 1.760"
CASE TRIM LENGTH: ... 1.750"

The 223 Remington began as a military cartridge in 1957 and was later introduced by Remington as a commercial round. The cartridge is now chambered by numerous manufacturers in a wide variety of firearms. Ready availability of inexpensive military surplus brass contributed greatly to the 223's popularity. It easily surpassed the 222 Magnum's following, and its acceptance is still growing.

When comparing the 222 Magnum and the 223 Remington, the case size appears to be nearly identical. However, the 222 Magnum is about one tenth of an inch longer and holds 1/2 to 1 grain more powder. 223 Remington cartridges should not be fired in a 222 Magnum as the case dimensions are different and the cases are likely to rupture, possibly causing injury.

The 223 Remington is an excellent choice for varmint hunters. At the time of this writing, the types of commercial actions chambered for the 223 Remington range from the Ruger Mini-14 semi-automatic to the Remington 40 XB. Couple this wide assortment of firearms with Hornady's superb selection of 22 caliber bullets and the 223 is adequate for any 22 caliber use. Varminters are encouraged to try the 22 caliber Hornady V-MAX bullets. These polymer-tipped bullets have been designed not only for their explosive performance on impact, they are very efficient ballistically and highly accurate.

223 Remington Service Rifle Data

RIFLE: .. Colt AR-15, Citadel Bbl
BARREL: 20", 1 in 9" Twist
CASE: Winchester
PRIMER: Winchester WSR

BULLET DIAMETER: 0.224"
MAXIMUM C.O.L.: 2.250"
MAX. CASE LENGTH: ... 1.760"
CASE TRIM LENGTH: ... 1.750"

The 5.56 x 45mm cartridge was intended for military use from its inception. The Armalite AR-15 rifle for which it was developed, after evolving into the selective fire M-16 and undergoing several years of Army testing, was adopted by the U. S. military and first saw action in the Vietnam War.

Acceptance of the AR-15 as a service match rifle began in the 1980s. Army Marksmanship units decided to use the M-16, the military equivalent of the AR-15, as their service match rifle in the 1990s. Both developments spurred demand for excellent long-range bullets for the AR-15 shooter.

The Hornady 68 grain BTHP has been a mainstay of the AR-15 shooter for some time and is excellent for 200 and 300 yard shooting. The record setting Hornady 75 grain BTHP can be loaded to function at magazine length and compete well at 600+ yards. The Hornady 75 grain A-MAX bullet is an excellent choice over 600 yard ranges in single shot shooting. (This bullet cannot be loaded to magazine length.)

Our best results were obtained with VIHT N-140. VIHT N-135 and AA 2495 gave excellent results but did not match VIHT N-140. Reloaders, especially former M1A/308 shooters, are cautioned not to load the 5.56 x 45mm beyond the AR-15's operating range lest case, barrel, and receiver life will be sacrificed.
